

BadgeWorks

Customized ID Card System

Customization Options

- Clear, protective overlay to one or both sides
- Dual-sided printing with automatic card flipping mechanism.
- Advanced card cleaning that will clean both sides of blank cards
- Magnetic strip encoding
- Full color printing
- Portrait or Landscape
- Holographs, barcodes
- Integrated Signatures

Eliminate Duplicate Data Entry

BadgeWorks can interface with existing systems, such as Digital PhotoManager, access control systems, evidence tracking, and employee databases to eliminate the need for duplicate entry.

Print Any Format on Any Card

Print virtually any custom format on smart cards, proximity cards, magnetic stripe cards, and plain PVC cards. Print dual-sided, edge-to-edge, and in landscape or portrait. The system supports Fargo, Zebra (formerly Eltron), and DataCard printers.

Durable and Secure

For additional durability and security, add laminates, barcodes, holographics, or integrated signature capture (includes signature pad).
