RAPID-ID

RAPID-ID uses advanced fingerprint matching techniques to provide immediate and accurate identification of an individual. RAPID-ID is a powerful tool that not only increases productivity, but improves officer and public safety.

Search Georgia & FBI Databases

Using two-finger biometric identification, RAPID-ID searches a centralized database located at GBI headquarters which contains more than 2.1 million enrolled unique SID records from arrests within the state of Georgia as well as the FBI Repository of Individuals of Special Concern (RISC) database. Data is transmitted via either a wireless network or a mobile data plan. In seconds, search responses are returned with an individual's identifying data about their criminal history, outstanding warrants, sex offender status, parole and probation status, and mugshot (when on file).

Successful Georgia Pilot

The successful 24-agency pilot was completed in June, 2010; the system expansion was completed in October, 2010 making RAPID-ID available to all Georgia agencies.

Free Evaluation Units

A limited number of free evaluation units are available on a first-come, first-served basis, so now is the perfect time to see how valuable RAPID-ID can be to your officers and your agency.

Adaptable Solution

Multiple Hardware / Wireless or Wired: Same Reliable, Fast Results

RAPID-ID is flexible in design and supports fingerprint scanner hardware from various manufacturers. Fingerprints can be scanned with Cogent BlueCheck, MC-75, or any other FBI-approved fingerprint scanner device. Images and results can be transmitted either wirelessly or between a wired USB device and a computer. You can view the results on your Blackberry smart phone, MDT, or any computer. And the all-in-one MC-75 scans prints and displays results.

Wireless or Wired Transmit between ANY fingerprint scanner and computer

Wireless Transmit between Cogent Bluecheck and Blackberry

RAPID-ID
results in seconds

Scan and View on MC-75

Affordable Solution for any size agency
Simple point and click software installation
Manage thousands of edge devices with single point connection to RAPID-ID system
Transaction Manager - Track the status of each fingerprint search transaction
Guaranteed delivery of each fingerprint search transaction (even if network is temporarily unavailable)
Reporting and Statistics - Use a Web browser application to track the success of your searches
Message Queue - Send messages from server to each edge device
Automated Software Updates
Automated Weekly Status Reports
