# LMS Plus

## Learning Management System— Online Training Program for DataWorks Plus Products

Training is a critical element in the successful migration to a new software application. DataWorks Plus has developed an LMS software application that will deliver, monitor and track training to ensure that all users have completed a minimum basic level of training before accessing a DataWorks Plus system. LMS presents interactive educational content to users, then tests their level of acquired knowledge.

- Streamlined User Registration Process
- Video Tutorials, Interactive Learning & Testing
- Convenient Accessibility - Users can access from anywhere and at any time
- Automated Grading, Reports, & Certificate Issuance
- Ensure Compliance Training
- Tracking - Track Progress, scores and overall performance
- Supports Personalization - Individualize training experience for specific user groups
- Reduce Learning Costs & Support Calls
- Refresher Training

## REGISTRATION

LMS users perform registration by creating an account with a username and password. An email notification will be sent to the user to verify their email address. Once verified, an email will be sent to an administrator for approval to activate the account with options to utilize specific user groups for individualized training.

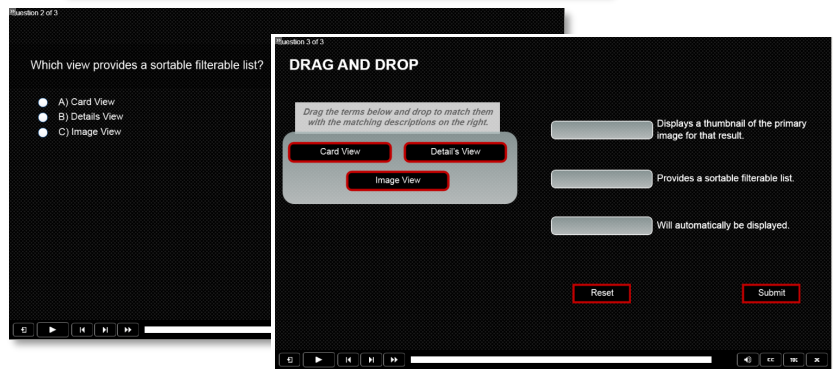

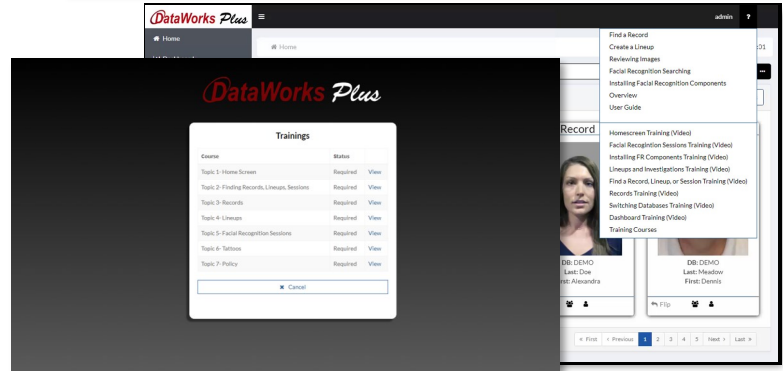

## INTERACTIVE LEARNING & TESTING

Once registered, the user will gain access to the training courses. Training includes content, multiple question types, and interactive exercises.

Question options include:

- survey vs. graded questions
- allocated point values
- number of attempts per question
- infinite attempts
- correct/hint/failure messages
- time limits
- passing percentage

Other course options include: table of contents, restricting fast forwarding, inserting links, closed captioning and more.

## PROGRESS MONITORING

Administrators can access the status of each individual user's progress through automated grading and administrative reports.
